

**OFFICIAL KANSAS STATE DEPARTMENT OF EDUCATION STUDENT FULLTIME  
EQUIVALENT AUDIT RESULTS FOR THE 2011-2012 SCHOOL YEAR**

The district (USD 113) student headcount FTE has been completed and is indicated in the chart below by Pre/K-12 building units. The auditor removed two .5 FTE's from the At-Risk Pre-school program. There is one Pre-school student each from Summerfield and Bern removed from the final FTE count. The reason for this is that the Pre-school program has only been approved for funding at 23 total students or an FTE of 11.5 (plus 1.5 for Special Education weighting )for the Pre-schools at Summerfield and Bern. These are the only two elementary schools in the district that are funded for an At-Risk pre-school program. Sabetha Elementary Pre-school is a Special Education program administered through the Holton CO-OP. We turned in 25 students or the equivalent of 12.5 FTE for the 2011-12 school year. The two students that were removed for FTE counting purposes had no other weightings than the .5 for being a half-time student (for example transportation, free lunch or special education weightings). The removal of any other student from the Pre-school program would have cost the district financially because of other weightings. It is the practice of KSDE to remove the students that cost the district the least amount of dollars if any changes are to be made. The board of education will be discussing these numbers at the regular board meeting on the 5<sup>th</sup> of December. If you have questions, please feel free to contact my office at 785-284-2175.
